

ENRACK – the compact energy storage solution

ENRACK is the compact, rack-assembled energy storage solution for critical infrastructures – with 100 kWh+ capacity and 350 kW peak performance for uninterruptible power supply in data centres, small businesses and industrial applications with time of reaction and low-maintenance operation.

ENRACK – the compact, rack-assembled energy electrostatic storage system

Applications:

-  Emergency Backup
-  Industry
-  Data Center
-  Telecommunication

The compact energy storage solution:

- ✓ Modular high-performance energy storage system
- ✓ Storage capacity from 5 to 8 kWh / module
- ✓ Ideal for telecommunications and industrial applications
- ✓ High cycle stability for long-lasting use
- ✓ Efficiency (RTE): >95%

ENRACK application areas:

- ✓ Industry and commerce
- ✓ Residential and commercial buildings
- ✓ Telecommunications
- ✓ Off-Grid-Solutions
- ✓ Emergency and disaster relief

Verfügbare Konfigurationen:

- ➔ Performance: 80kWh, 100 kWh, 200 kWh, ...
- ➔ Voltage: 48V, ... , 2000V
